

# amifol K<sup>®</sup>

Potassium-based concentrated solution  
containing L- $\alpha$ -amino acids

## DESCRIPTION

Liquid solution, with a high potassium concentration and synthetic amino acids, indicated for the prevention and correction of potassium deficiencies, favouring ripening of fruits in the final stages of the crop

## MAIN BENEFITS

- Specially recommended for times when maximum amounts of potassium are required, for example after fruit set, during fruit development and during reserve accumulation, as well as for stimulating fruit ripening
- Maximum quality for fruits with improved flavour and colour, larger size, hardness and consistency, guaranteeing its shelf life and storage
- The addition of synthetic amino acids, which are active and can be fully absorbed, increase the product's effectiveness
- The product can be applied by foliar spray or through the irrigation system on all crop types

**TECHNICAL SPECIFICATIONS**

- Potassium (K<sub>2</sub>O): 46.5% w/v (31% w/w)
- Amino acids: 7.5% w/w (5% w/v)
- Presentation: Soluble liquid (SL)

**FOLIAR APPLICATION**

<b>General dosage</b>	250-350 cc/100 L of water	2-3 applications
-----------------------	---------------------------	------------------

**DOSAGE AND METHOD OF USE**

**SOIL APPLICATION (DRIP IRRIGATION)**

<b>General dosage</b>	8-12 L/ha	Apply every 10-15 days up to 30-60 L/ha
