

cocktail pearl

Unique concentrated Calcium with Zinc and Boron
& no Nitrogen or Chlorides, 100% soluble

DESCRIPTION

- Unique 100% soluble mix of Calcium, Boron and Zinc EDTA
- Calcium is protected by an organic complex to increase uptake
- Contains no Nitrogen, Chlorides, Carbonates or Sulphates
- Apply from pre-flowering until fruit colouring
- Calcium demand is highest from petal fall until fruits reach 1/3 size
- Early applications promote skin elasticity and reduce later incidence of cracking
- Particularly suited for use on salad leaves, vegetables and orchard crops
- Suitable for use in all foliar and fertigation equipment
- Production facilities certified to ISO 9001 & ISO 14001
- Excellent tank mix compatibility
- Guaranteed Contents

TECHNICAL SPECIFICATIONS

- | | |
|-------------------------------|----------------------|
| - Calcium (CaO): | 34.0% w/w |
| - Zinc (Zn) chelated by EDTA: | 1.72% w/w |
| - Boron (B): | 0.82% |
| - Presentation: | Wettable Powder (WP) |

cocktail pearl

MAIN BENEFITS

- The zero Nitrogen formulation allows additional Calcium to be incorporated into existing nutritional programs without increasing N
- Reduces Blossom End Rot, Tip Burn and other Calcium and Boron disorders
- Enhanced sugar translocation due to the synergistic role of Zinc & Boron
- Inclusion of Boron with Calcium reduces cracking risk
- Increases quality and shelf life of fruit and vegetables
- Suitable for use on all crops including wine grapes
- WP powder formulation allows for easy pouring and no rinsing of packaging
- 100% and rapidly soluble - no blockages

FOLIAR APPLICATION

General dose (Horticultural Crops)	1.3 kg /ha	2-5 applications from fruit set every 14 days as required
General Dose (Orchards & Vines)	2-4 kg /ha	2-6 applications every 14-21 days from fruit set until harvest
Salad Leaves	2-4 kg /ha	3-5 applications every 10 - 14 days from petal fall

DOSAGE AND
METHOD OF USE

DRIP IRRIGATION

General Dose	2-4 kg /ha	2-5 applications from fruit set as required
